## **NOAA's National Marine Sanctuary of American Samoa seeks advisory council applicants**

NOAA's National Marine Sanctuary of American Samoa is seeking applicants for the education, fishing and youth member (between the ages of 14-25) seats on its advisory council. The council ensures public participation in sanctuary management and provides advice to the sanctuary superintendent.

"The members of our advisory council represent extremely important sectors of our community," said Gene Brighthouse, sanctuary superintendent. "Their input, experience and expertise assist the sanctuary in making informed and timely decisions on how to best manage our cultural and ocean resources."

Candidates are selected based on their expertise and experience in relation to the seat for which they are applying, community and professional affiliations, and views regarding the protection and management of marine resources. Applicants who are chosen as members should expect to serve a three-year term.

The sanctuary advisory council was established to ensure continuous public participation in the management of the sanctuary. The council's 17 voting members and eight non-voting members serve on a volunteer basis and represent a variety of local user groups, the general public, and territorial and federal governmental jurisdictions.

Applications are due Wednesday, Nov. 30. To receive an application kit, or for further information, please contact Joseph Paulin via email at [Joseph.Paulin@noaa.gov](mailto:Joseph.Paulin@noaa.gov); by phone at 684-633-6500 ext. 226; or by mail at National Marine Sanctuary of American Samoa, Tauese P.F. Sunia Ocean Center, P.O. Box 4318, Pago Pago, AS 96799. Application kits can also be downloaded from the sanctuary's website at <http://americansamoa.noaa.gov>.

National Marine Sanctuary of American Samoa is located in the cradle of Polynesia's oldest culture and is thought to support the greatest diversity of marine life in the [National Marine Sanctuary System](#), including a wide variety of coral and other invertebrates, fishes, turtles, marine mammals and marine plants. NOAA co-manages the sanctuary with the American Samoa government and works closely with communities adjacent to the sanctuary, all within the context of Samoan cultural traditions and practices.

NOAA's mission is to understand and predict changes in the Earth's environment, from the depths of the ocean to the surface of the sun, and to conserve and manage our coastal and marine resources. Join us on [Twitter](#), [Facebook](#), [Instagram](#) and our other [social media channels](#).
